1. Introduction

A store manager plays a vital role in managing inventory efficiently. This documentation outlines how a store manager acts as the key point in tracking, controlling, and maintaining inventory levels to ensure smooth store operations.

2. Objectives

- Maintain accurate stock levels.
- Prevent overstocking and stockouts.
- Minimize shrinkage and losses.

- Ensure timely reordering and restocking.
- Provide inventory reports for decision-making

3. Store Manager Responsibilities

- Monitor daily stock movement.
- Supervise stock receiving and dispatch.
- Ensure real-time updates in inventory systems.
- Conduct physical stock counts.
- Report stock discrepancies.
- Communicate with vendors and suppliers.

4. Inventory Tracking Tools

- **Point of Sale (POS) System:** Auto-updates inventory with every sale.
- **Inventory Management Software:** Provides real-time data, reorder alerts, and reporting.
- **Barcode Scanners:** For accurate product tracking and faster audits.

5. Inventory Processes

a. Receiving Inventory

- Verify items against purchase orders.
- Check for damages or shortages.
- Update inventory system **immediately**.

b. Stock Monitoring

- Daily shelf checks.
- Refill fast-moving items.
- Flag low-stock products for reordering.

c. Inventory Counts

- Cycle Counting: Weekly/biweekly count of specific items.
- Full Stock Audit: Monthly or quarterly physical count.
- Update system data based on findings.

Store Manager – Key to Tracking Inventory

1. Introduction

A store manager plays a vital role in managing inventory effectively. This documentation outlines how a store manager acts as the key point in tracking, controlling, and maintaining inventory levels to ensure smooth store operations.

2. Objectives

- Maintain accurate stock levels.
- Prevent overstocking and stockouts.
- Minimize shrinkage and losses.
- Ensure timely reordering or restocking.
- Provide inventory reports for decision-making.

3. Store Manager Responsibilities

- Monitor daily stock movement.
- Supervise stock receiving and dispatch.
- Ensure real-time updates in inventory systems.
- Conduct physical stock counts.
- Report stock discrepancies.

4. Inventory Tracking Tools

a. Receiving Inventory

- Verify items against purchase orders.
- Check for damages or shortages.
- Update inventory system immediately.

b. Stock Monitoring

- Daily shelf checks.
- Refill fast moving items.
- Flag low-stock products for reordering.

c. Inventory Counts

- Cycle Counting: Weekly count of specific items.
- Full Stock Audit: Monthly or quarterly physical count.
- Update system data based on findings.

6. Reporting

- Generate inventory reports (daily, weekly, monthly).
- Analyze product performance (fast/slow movers).
- Identify inventory shrinkage or mismatches.
- Submit inventory data to upper management.

7. Loss Prevention

- Monitor for theft, damage, or expiry.
- Train staff on stock handling.
- Use surveillance and access control.
- Maintain strict return and damage logging.

8. Reordering and Supplier Management

- Set reorder levels in software.
- Build relationships with reliable vendors.
- Monitor lead times and delivery accuracy.
- Keep purchase order records updated.

9. Conclusion:

- STORE MANAGER – KEY TO TRACKING INVENTOR
